Index to Volume 7: Subject

A
Acculturation, 81
Acquired immunodeficiency syndrome (AIDS), 256–257
Acute-care nursing services, clinical competencies for, 33–38
Adaptation, to genital herpes, 101–102
Adolescent
  health, patient teaching for, 166
  limit-testing behavior of, 24
  mobility of, 24
  separation process of, 23–24
Adolescent parents
  cognitive development of, 22–23
  indicators of conflict, 24–25
  intervention strategies for, 25–27
  strategies for, reinforcement of, 26
Adolescent pregnancy
  contraceptive use and, 107
  hispanic risk, 105–110
Aggregates, nursing diagnoses for, 251–255
AIDS (acquired immunodeficiency syndrome), 256–257
Albrecht Nursing Model for home health care, 120–125
American Red Cross, 171
Anemia screening, 40–41
Appraisal support, for nurse executives, 198–199
Army community health nurses, 170
Assessment
  of community, 16–17
  competencies for, 36
  definition of, 36
Attendance, of elderly clients in public health care nursing program, 113, 114

B
Benefits, perceived by elderly clients in public health care nursing program, 113–115
Birth rates for hispanics, age-specific, 108
Body image, health attitudes and, 244
Brief symptom inventory (BSI), 198

C
California, public health nursing resources, 48
Care coordination, for home health nursing practice, 204–207
Care giver value orientation
  competencies for, 38
  definition of, 38
Case finding
  competencies for, 35
  definition of, 35
Case management
  competencies for, 36
  definition of, 36
Center for Epidemiologic Studies-Depression scale (CES-D), 71–77
Chinese, health attitudes of, 244
Circumplex model of families (CMF), 162
Client-centered benefits, of elderly clients in public health care nursing program, 113–115
Client perceptions, importance in health care, 116
Cognitive reappraisal, 165
Cohesion, family
  nature of, 162, 163
  nursing interventions for, 164–167
Collaboration
  competencies for, 37
  definition of, 37
Common ground, creation of, 218, 219
Communication, community, 17–18
Community assessment, in life span model, 16–17
Community assessment instrument, life span, 17–18, 20–21
Community embeddedness, 15
Community health indicators, cross-cultural health attitudes and, 243–249
Community health nurses
  context for home visitation of postpartum families, 170–171
  implications of genital herpes, 101–102
Community health nursing education, Master-level core curriculum, 150–160
Community health nursing practice
  life span development perspective and, 13–19
  trends in, 34–35
Conceptual framework, for psychologic well being of nurse executives, 195–196
Contextualism, 14
Continuing education, nursing
  in Florida, 237–241
  future perspective, 241
  historical perspective, 236–237
  topics for, 238–239
Contraceptive use, adolescent pregnancy and, 107, 108
Control, in nurse-client interactions, 220–221
Coombs model of Home health care, 119–120
Coping strategies
  effectiveness of, 195
  for nurse executives, 198, 199
Cross-cultural health attitudes, community health indicators and, 243–249
Cuban-Americans, adolescent pregnancy risk, 106–110
Cultural diversity
  in health attitudes, 244–245
  nursing and, 145–146
  pilot project, implementation of, 147–149
  student awareness of, 146–147
Cyanmethemoglobin method, for hemoglobin measurement, 41

D
Day-care centers, fecal coliform contamination patterns, 224–227
Decision making priority setting
  competencies for, 36
  definition of, 36
Deficit diagnoses, for groups, 253
Dependency, in patient-classification schemes, 139
Dependency at discharge instrument
  application to home care, 140–143
  development of, 139–140
Depressive symptoms, in mothers of young children, 71–77
Diagnosis-related groups (DRGs)
  community-based nursing and, 33, 34
  government response to, 66–67
  home health agencies and, 66–67
  impact of, 65–66, 204, 256
  nursing care hours and, 69
Diarrhea, in day-care centers, coliform contamination patterns of, 224–227
Discipline, of toddler by teenage parent, 26
Dreher model of home health care, 119
DRG. *See* Diagnostic-related groups
Dynamic interaction, 14, 15

E
Early and Periodic Screening, Diagnosis, and Treatment program (EPSDT)

Early and Periodic Screening, Diagnosis, and Treatment program, *continued*
background of, 3–4
interventions to encourage usage, 5–11
PRECEDE model, 4–5
Education, nursing
ethical decisions and, 257
improvements for clinical competencies, 38
master-level core curriculum, 150–160
Elderly
home health care trends, 67–68
needs of, as continuing education topic, 240
public health care nursing perspective, 111–116
Embeddedness, 14, 15
Emotional support, 199
Emotion-regulation strategies, 195–196
Environment
elderly nursing care and, 229–234
sampling, for fecal coliform contamination, 225, 226
EPSDT (Early and Periodic Screening, Diagnosis, and Treatment program), 3–4
ESI (Everyday Stressors Index), 72–77
Ethical dilemmas, in home health care, 256–257
Ethics committees, of home health agencies, 258–259
Ethnograph, 198
Evaluation, group nursing diagnoses and, 254–255
Everyday Stressors Index (ESI), assessment of maternal depressive symptoms, 72–77

F
Family
composition of, 162
external structure, 162, 164
internal structure, 162
religious influence, 164
Family cohesion
nature of, 162, 163
nursing interventions for, 164–167
Family conflicts, 164–165
Family dynamics, 164
Family planning, public health nurses and, 175–180
Family structure, external components, 161
Fathers, teenage, 24–25
Fecal coliform contamination, day-care centers patterns, 224–227
Fertility rate, for hispanics, 105
Financial resources, of patients receiving unbilled home care, 63
Finland, health attitudes in, 244
First aid, for hymenoptera stings, 93
Foster care problems, 166–167

G
Genital herpes simplex virus infection
adaptation to living, 99
community health nurses, implications for, 101–102
coping, 99
incidence of, 96–97
knowledge, attitudes and behavior related to, 97–98
physical consequences of, 97
psychosocial aspects of, 96–102
public, implications for, 101
recurrences, psychosocial consequences of, 99
response to treatment, 99, 101
symptoms of, 97
Global severity index (GSI), 198
Greek-Americans, health attitudes in, 244
Groups
diagnosis of, verification of, 254
nursing diagnoses for, 251–255
target, identification of, 254
Growth records, of migrant children, continuity of care and, 209–214
GSI (global severity index), 198

H
Health Belief Model, 4
Health care system management
competencies for, 37
definition of, 37
Health departments, local staff reductions, 240
Health-maintenance organizations (HMO), 28
Health-promoting behaviors
description of, 80–81
of migrant farm workers, 81–86
Hematocrit, 40
Hemoglobin measurements, 40–41
Hemoglobinometer, reliability and validity testing of, 40–44
Hispanic background, health-promoting behaviors and, 81
Hispanic Health and Nutrition Examination Survey (HHANES), 105–110
Hispanics, risk for adolescent pregnancy, 105–110
HMO (health-maintenance organizations), 28
Home health care
changing demographics and, 67
Coombs model of, 119–120
current research, 67–68
definition of, 118–119
dependency at discharge instrument, application of, 140–143
Dreher model of, 119
ethical dilemmas, 256–257
historical perspective, 60–61, 118
Landau model of, 120
models, development of, 119
prospective reimbursement, 68–69
Shortell model of, 120
Home health care agencies
diagnosis-related groups and, 66–67
ethics committees of, 258–259
information needs for prospective payment, 65–69
marketing of, 28–32
nonreimbursed care, 60–64
physician referrals, 28–30
Home health care models, 119–120. *See also specific models*
Home health care services, reimbursement for, 69
Home health nursing practice, care coordination, 204–207
Home remedies, cultural diversity and, 148
Home visiting programs
community-volunteer based, 169–174
to encourage EPSDT usage, 6–11
Hopkins symptom checklist (SCL-90), 198
Hospital discharge rates, home health care needs and, 65–66
Hospital services, current usage trends, 65–66
Human development, life span perspective of, 14–15
Hymenoptera stings
first aid for, 93
morbidity from, underrecognition of, 88–94

I
Immigrants, 240
Indians, health attitudes of, 244
Infant mortality, cross-cultural attitudes of, 246–249
Informational support, for nurse executives, 200

Insect stings, morbitity from, 88–94
Institutional review boards, 258
Instrumental support, for nurse executives, 200
International Classification of Diseases (ICD-10), 69
Interorganizational field model, 46

L
Landau model of Home health care, 120
Leadership
  competencies for, 37
  definition of, 37
Legal issues
  competencies for, 37
  definition of, 37
Legislation, on home health care, 60
Life expectancy, cross-cultural attitudes of, 246–249
Life orientation test (LOT), 198
Life span community assessment instrument, 17–18, 20–21
Life span perspective
  case presentation, 18–19
  community assessment, 16–17
  in community health nursing practice, 15–19
  description of, 14–15
  theoretical background, 13–14
Limit-testing behavior, toddler vs. adolescent, 24
Literature review
  on care coordination, 205–206
  on health attitudes, 243–245
  on health-promoting behaviors, 81
  on nurse-client interactions, 215–216
  on stress in elderly, 230–231
LOT (life orientation test), 198

M
Marketing audit, for home health agency, 29, 30–31
Marketing plan, for home health agency, 29, 31
Maternal depression, assessment of, 71–77
MCD (minor civil divisions), 231
Mechanistic model, 13
Medicaid, savings from EPSDT, 4
Medicare
  home health care service reimbursement, 69
  nonreimbursed home health care, 62, 63
Metropolitan communities, elderly stress and, 229–234
Mexican-Americans
  adolescent pregnancy risk, 106–110
  migrant farm workers, health-promoting lifestyles profile of, 80–86
Migrant children, family-carried growth records of, 209–214
Migrant Student Record Transfer System (MSRTS), 209
Minor civil divisions (MCD), 231
Mirex, 89
Mobility, toddler vs. adolescent, 24
Mormon beliefs, 164
Mother-child relationship, indicators of conflict with teenage mother, 24–25
Mothers
  teenage, relief for, 25–26
  of young children, depressive symptoms of, 71–77
MSRTS (Migrant Student Record Transfer System), 209
Music, cultural diversity and, 148

N
NANDA (North American Nursing Diagnosis Association), 69
National Association of Physicians in Home Care (NAPHC), 28
National health insurance, 59
NIRH (Nurses' Involvement in Reproductive health), 176–180
Nonnormative life events, 14
North American Nursing Diagnosis Association (NANDA), 69
North Carolina
  EPSDT usage, improvement of, 3–11
  Tri-County Community Health Center MCH migrant health project, 210–213
Nurse-centered benefits, of elderly clients in public health care nursing program, 113–115
Nurse-client interactions
  assessment approaches, 219–220
  care context of, 221–222
  content of, 218–219
  control in, 220–221
  further research, recommendations for, 222
  literature review, 215–216
  nursing interventions and, 220, 221
  nursing style and, 221
  phases of, 218, 219
  rolling evaluation, 222
  study method, 216–218
Nurse contacts, unbilled, 62–63
Nurse executives
  occupational stress of, 194
  psychologic well-being of, 194–202
Nurse-managers, marketing of home health agencies, 30
Nurses' Involvement in Reproductive health (NIRH), 176–180
Nurse visits, unbilled, 62–63
Nursing diagnoses
  for aggregates and groups, 251–255
  taxonomy of, 254
Nursing interventions
  for family cohesion, 164–167
  nurse-client interactions and, 220, 221
Nursing management, continuing education perceptions, 240–241
Nursing role, scope of, for groups, 253–254
Nursing staff, continuing education perceptions, 240–241
Nursing style, nurse-client interactions and, 221
Nutrition, cultural diversity and, 148

O
Omaha classification scheme (OCS), 69
Optimism, psychological well-being and, 195–196, 202
Organismic model, 13–14
Organization, resource dependence theory of, 46–47

P
Pamphlets, to encourage EPSDT usage, 6–11
Parents, adolescent vs. older, 22–23
Patient care classification systems, 69. *See also specific classification systems*
Patient classification systems
  development of, 130–131
  in health care, 138–139
  in home health care, 130–137
  patient characteristics and, 131
  service characteristics and, 131
Patient teaching, for family cohesion, 166–167
Pessimism, 195–196
PHCA (Preventive Health Care for Aging program), 112–116
Physicians, referrals to home health agencies, 28–30
Pilot study. *See also specific studies* for research project direction, 3–11
Plasticity, 15

Political activities, of public health nurses, 178–179
Population size change, elderly stress and, 230
Postpartum families, community-volunteer based home visiting programs for, 169–174
PRECEDE model, for EPSDT use, 4–5
Preventive Health Care for Aging program (PHCA), 112–116
Prospective payment
  information needs for, 65–69
  patient care classifications for, 69
Public health, cross-cultural attitudes of, 246–249
Public health care nursing, elderly clients' perspective, 111–116
Public health nurses
  family planning and, 175–180
  salaries of, 181–188
Public health nursing
  challenge of, 241
  cross-training in core services, 52–56
Public health nursing departments
  application of resource dependence theory, 49–50
  current resources for, 45–46
Public health nursing resources, state-county relationship and, 47–49
Puerto Rican-Americans, adolescent pregnancy risk, 106–110

R
Rational emotive therapy (RET), 165
Recruitment, for volunteer home visiting programs, 171–172
Red imported fire ants, morbidity from, 88–94
Referrals, to home health agencies, 28
Refocusing, for genital herpes patient, 101–102
Reframing, for genital herpes patient, 101–102
Reimbursement, for home health care services, 69
Reliability testing, of whole-blood hemoglobinometer, 40–44
Religious influence, on family, 164
Research, group nursing diagnoses and, 254–255
Resistance resources, 195–196
Resource dependence theory
  application to county nursing resources, 49–50
  description of, 46–47
Role modeling, 166
Role playing, 165–166
Role supplementation, 165–166

S
Salaries, of Public Health nurses, 181–188
Scope of Public Health Nursing Practice, 239–240
Screening
  competencies for, 35
  definition, 35
SEARCHN, 34
Separation process, toddler vs. adolescent, 23–24
Sexually transmitted disease
  genital herpes. *See* Genital herpes simplex virus infection
  treatment of, 178
Shortell model of home health care, 120
Skinner, B.F., 13
Social Security Act, 28, 34, 60
Social support, for nurse executives, 195, 198–200
Sociodemographics
  of hispanic adolescent pregnancy, 107–108
  in maternal depression, 73, 74
South Carolina, Pee Dee I Public Health District, 52–53
State-county relationship, public health nursing resources and, 47–49
Stress
  among elderly, community differences in, 229–234
  maternal depression and, 72
  for nurse executives, 202
  sources of, for elderly, 232–233
Stressors, of nurse executives, 194, 196–199
Stress response, negative, to work, 195
Surgery, non-hospital based, 66

T
Teaching
  competencies for, 37
  definition of, 36
Telephone calls, to encourage EPSDT usage, 6–11
Thailand, health attitudes in, 244
Time spent, by nurses in daily activities, 206–207
Toddlers
  behavior explaination, for teenage parent, 25
  developmental similarities with adolescents, 22
  limit-testing behavior, 24
  mobility of, 24
Tri-County Community Health Center MCH migrant health project, 210–213

U
United States government, diagnosis-related groups and, 66–67

V
Validity testing, of whole-blood hemoglobinometer, 40–44
Verification of certification (VOC), 210
Virginia public health departments, nonreimbursed home health care and, 61–64
Volunteer home visiting programs
  evaluation of, 173–174
  implementation of, 172–173
  for postpartum families, 169–174
  role preparation for volunteer, 172
  volunteer coordinator for, 172

W
Wellness diagnoses, 252
Women, Infants, and Children (WIC)
  growth information from, 209–210
  Tri-County Community Health Center MCH migrant health project, 210–213
